

Subject: Instrument panel.

Effectivity: Sailplane LS1, version f, optional.

Reason: Improves forward visibility, especially for contest pilots.

Instructions: Compared to the normal version (upper part hinged) the position of the special version (upper part fixed) has been moved 20mm backwards (towards datum point). Lever arm is 940mm in front of datum point. The normal cover of the panel has to be shortened by 95mm.

Getting into and out of the cockpit is not restrained due to sloped underside.

The special version holds one instrument of 80mm in diameter less than the normal version.

Materials: See drawing No. LS1-f R7-11, Edition 2.4.76.

Weight and Balance: Insignificant.

Remarks: Change after agreement of the maker only.
