

SUBJECT : Vibration damper, switchable version

EFFECTIVITY : Sailplane models LS6 and LS6-a, all serial numbers

ACCOMPLISHMENT : optional

REASON : Instead of the damper according to TB 6010, a switchable

MATERIAL : version according to drawing 1BR-92a may be installed.

INSTRUCTIONS :

Additionally to instructions according to TB 6010, the following must be checked:

1. Check switching mechanism for function and unobstructed operation.
2. Check switching forces in the most unfavourable switching position.

WEIGHT AND
BALANCE

: Additional weight 1.3 kg (2.87 lbs)

Check Maximum Cockpit Load according to Chapter 6 of Flight Manual. Variation of C.G. to be neglected.

REMARKS : Accomplishment by manufacturer or licensed repair station.

Accomplishment of TB (LBA- AD 86-140/2) must be checked by inspector, enterd on page 8-1 of Instructions of Continued Airworthiness (TB-AD-Accomplishment List) for TB 6010 and TB 6011 and in logbook and signed by inspector.
